# INTEGRITY SERVICE EXCELLENCE

With over 17 years' experience in the emergency services restoration industry, our experienced and certified remediation technicians provide both a timely response and efficient solution for a highly detailed cleaning in a variety of workplace environments. In today's challenging viral climate, our commitment is to restore and foremost help our community regain the security of a clean and safe workplace.

Although the blueprint for every project is different, our proprietary methods ensure a standard of excellence for all our clients with results that are tangible and visual. Employees will have confidence in the level of professional cleaning and thankful that management is proactive in their workplace safety.

Joe Taylor Restoration is dedicated to helping our community. We have donated our services to disinfect and clean our first responder's vehicles and stations, donating PPE to medical staff, and have made monetary donations to several local food banks as they have become a lifeline for so many struggling during this pandemic crisis. Not only are we able to meet the needs of business continuity but together we can help those that are helping others too.

**OUR QUALITY & ATTENTION  
TO DETAIL IS UNMATCHED**
